

AIRKinectv2 ANE **- available licenses -**

- technical overview -

Tastenkunsts AIRKinectv2 ANE is a wrapper for the body tracking SDK „Kinect v2 for Windows“ from Microsoft. It is an Adobe AIR native extension (ANE) for Windows 8 and 8.1.

Microsoft provides an excellent overview of the Kinect v2 SDK on
<http://kinectforwindows.org>

For important information on technical specifications and hardware requirements please visit:
http://www.microsoft.com/en-us/kinectforwindows/purchase/sensor_setup.aspx

The SDK (ANE version) can be downloaded from our website as a trial version. Play around with the code and find out, whether it fits your requirements:
<http://www.tastenkunst.com/#/kinect>

- terms -

We charge per project. A „project“ means one application developed for a single customer only. This application is available only in a single context, e.g. an interactive installation. If you want to use your application in more than one context, contact us with the details.
If you resell your application to more than one client, we consider that as a new project for every sale. Again, please contact us, if you want to talk about special conditions for your project or product.

Please note, that this is a current state license information. It may change any time, so please contact us for a current license sheet, if you want to start a new project. Thanks.

- licensing costs -

A license costs 500 EUR per project (flat fee), which might or might not be an equivalent of 1 to 3 working days depending on your location and rates. Please be fair and pay for your commercial projects. Thank you mates! And tell us about your project success, we will be happily sharing it with the community.

- support and development services -

If you need support during the development of a Kinect v2 project we offer you up to 1 hour free of charge email or Skype chat support per bought license. We also offer development services if you need a reliable partner for your project. Feel free to contact us with the project details.

Best Regards
The Tastenkunst Team
